FLUCONAZOLE (for vaginal thrush)

floo-kon-ah-zole

What does it do?

Fluconazole is used to treat vaginal thrush.

Before you start

- Tell your doctor if you have liver, kidney or heart problems, or have ever had a seizure.
- Tell your doctor if you are pregnant, planning to become pregnant, or breastfeeding.

How should you take it?

Take *fluconazole* as a single dose of 150 mg with food and a glass of water.

Can you take other medicines?

Tell your pharmacist or doctor about all medicines or treatments that you may be taking, including vitamins, herbal products or recreational drugs.

What side effects might you notice?

Most people do not notice any side effects when taking the single 150 mg dose.
